Welcome!

The fun is about to begin!

I designed the K'NEX building system for creative kids like you – kids who want to build in a whole new way. Using our snap-together Rods, Connectors and color-coded instructions, you can build the models we've designed – or use your imagination and build cool models of your own! That's what K'NEX is all about – getting an idea and making it happen. Just like I did when I invented K'NEX!

Joel Glickman
Inventor of K'NEX

About the Set

From helicopters to space explorers, a cool Ferris wheel to a chopper bike, these models were picked by hundreds of kids just for this set! Builders' Choice is the first set created by kids to feature cool metallic colors. As always, step-by-step instructions help you build every model... or use your imagination to make all new stuff!

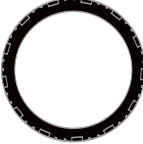

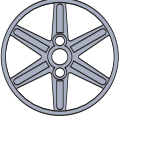

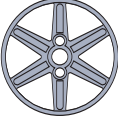

Why K'NEX

IT'S THE SPECIAL **ROD 'n CONNECTOR** SYSTEM!

- Snap-Together Pieces That Stay Together!
- Shapes And Lengths That Let You Build Bigger!
- Special Connections For Models That Move!
- Color-Coded Parts And Instructions To Make Building Easier!

What's Included

Before you start building, be sure to compare the parts in your case with the parts listed. If anything is missing, look at the back cover of this instructions booklet to contact us. We're here to help!

Building with K'NEX

You'll find models for three levels of building.

Friendly Challenge

Moderate Challenge

Greater Challenge

Ready, Set, Build

To begin your model, find the **1** and follow the numbers. Each piece has its own shape and color. Just look at the picture, find the pieces in your set that

match what you see, and snap them together. Try to hold your model in the same direction as in the picture so you'll attach your pieces to the right place.

Movin' On

The faded colors tell you this section is already built. You'll want to connect the new section to the place where the arrows are pointing. This piece will be in full color.

Spacers

There are places in your model where you need to add blue and silver Spacers. Be sure to count them carefully.

Connectors

It's very important to position blue and silver Connectors in a specific direction. Pay close attention to the instructions, and position these Connectors horizontally or vertically exactly as they are shown. Push together tightly until you hear a "click".

Flexi-Rods

A Flexi-Rod is a Rod that you can bend to make curves. It will be easier to attach to your model if you bend it back and forth first.

⚠ Caution:

Keep hands, face, hair, and clothing away from all moving parts.

Bienvenue!

F Que la fête commence ! J'ai imaginé le système de construction K'NEX pour des jeunes comme toi, débordants de créativité – des jeunes souhaitant réinventer le jeu de construction. À l'aide de nos tiges et connecteurs s'encastrent les uns dans les autres ainsi que de nos instructions codées par couleur, tu peux assembler les modèles que nous avons conçus – ou construire des modèles sortis tout droit de ton imagination ! La philosophie de K'NEX c'est précisément cela : avoir une idée et la réaliser. Ce que j'ai fait justement, lorsque j'ai inventé K'NEX !

*Joel Glickman
Inventeur de K'NEX*

À propos de la série

D'hélicoptères à des véhicules d'exploration de l'espace, d'une fabuleuse Grande Roue à une moto d'enfer, ces modèles ont été choisis par des centaines de jeunes pour cette série précisément ! Builders' Choice est la première série créée par des jeunes qui ait des couleurs métalliques super cool. Comme toujours, des instructions étape par étape t'aident à construire chaque modèle...tu peux aussi faire appel à ton imagination pour créer toutes sortes de choses !

Pourquoi K'NEX ?

C'est l'unique système à tiges et connecteurs !

- Avec des éléments s'emboîtent solidement les uns dans les autres !
- Avec toutes sortes de formes et de longueurs te permettant de construire toujours plus grand !
- Avec des connexions toutes spéciales pour les modèles mobiles !
- Avec des éléments chromocodés (codés par couleur) et des instructions pour te faciliter la tâche !

Montage avec K'NEX

1. Tu trouveras des modèles pour trois niveaux de difficulté.

Défi amical

Défi modéré

Plus grand défi

Prépare-toi à construire

2. Pour commencer le modèle, trouve le numéro 1 et suis les chiffres. Chaque pièce a sa propre forme et couleur. Il suffit de regarder l'illustration, de trouver les pièces dans ton jeu qui correspondent à ce que tu vois et de les enclencher. Essaie de tenir le modèle dans le même sens que dans l'illustration. Ainsi, tes pièces seront attachées correctement.

Continuation

3. Les couleurs affaiblies indiquent que cette partie est déjà montée. Tu dois raccorder la nouvelle partie à l'endroit indiqué par les flèches. Ces pièces seront en pleine couleur.

Pièces d'écartement

4. Il y a des endroits dans ton modèle où tu dois ajouter des pièces d'écartement bleues et argentées. Assure-toi d'utiliser la couleur exacte et de compter les pièces avec soin.

Connecteurs

5. Tu trouveras des connecteurs bleus et violets comportant des fentes extra-longues. Ils se glissent l'un dans l'autre tel qu'illustré. Pousse les pièces ensemble jusqu'à ce que tu entendes un "déclic".

Tiges flexibles

6. Une tige flexible est une tige orange ou violette que tu peux courber. Elle s'attachera plus facilement à ton modèle si tu la courbes d'abord plusieurs fois avant son installation.

⚠ Attention:

7. Les élastiques peuvent causer des blessures en claquant, en se cassant ou quand on les manipule imprudemment. Tenez fermement l'élastique lors de l'assemblage du modèle en veillant à ne pas trop le tendre. N'utilisez les élastiques que selon les instructions. **N'UTILISEZ PAS D'ÉLASTIQUES ÉRAILLÉS OU DÉCHIRÉS.** Attention: Tenez les élastiques en caoutchouc à l'écart du visage et des yeux.

Et après ?

Félicitations, le 50 Model Building Set n'a plus de secrets pour vous ! Mais n'oubliez pas que les meilleures idées peuvent parfois sortir tout droit de votre imagination.

Que pourriez-vous bien construire d'autre ? Commencez par les modèles que vous avez construits à partir de cette série et transformez-les en changeant les pièces de place. Ce n'est pas plus difficile que cela. Que pouvez-vous inventer ? Changez la couleur de

votre Moon Buggy en utilisant différentes pièces K'NEX. Changez la forme des oreilles du Rabbit. Vous pouvez même complètement transformer les modèles. Transformez le Frog Coaster en un Dog Coaster ou bien le Chopper en une Space Shuttle ! Si vous êtes à court d'idées, regardez dans votre chambre ou par la fenêtre et essayez de construire des trucs que vous voyez. Avec K'NEX, c'est possible !

es modèles une fois construits, qu'est-ce que je fais ? Montrez-les à votre famille et vos amis ou bien trouvez d'autres façons de jouer avec vos modèles K'NEX en vous servant d'autres jouets ou d'objets qui traînent chez vous. Vous pouvez par exemple inventer un nouveau jeu en lançant une balle dans The Rejector ou construire une cage pour votre Parrot avec des bâtonnets en bois. Que pouvez-vous bien imaginer ?

Prêt à relever d'autres défis K'NEX ?

C'est tout un univers qui vous attend avec K'NEX n de véhicules pouvant se déplacer à des robots animés en passant par de grosses machines ! De quoi s'amuser pour toute la famille !

Cherchez d'autres séries K'NEX dans votre magasin préféré ou rendez-nous visite en ligne à www.knex.com.

E Qué se incluye

Desde helicópteros a exploradores espaciales, una fabulosa Vuelta al Mundo a una motocicleta tipo "chopper", estos modelos fueron elegidos por cientos de chicos, ¡justamente para este conjunto! Builders' Choice es el primer conjunto creado por chicos, que presenta modernos colores metálicos. Como siempre, instrucciones que van paso a paso te ayudarán a construir cada modelo... ¡o usa tu imaginación para hacer toda clase de nuevas cosas!

Construcción con K'NEX

1. Encontrarás modelos para tres niveles de construcción.

Amigable desafío

Moderado desafío

Enorme desafío

Todo listo, comienza a construir

2. Para comenzar tu modelo, busca el  y sigue los números. Cada pieza tiene su propia forma y color. Simplemente mira los dibujos, busca las piezas correspondientes en tu juego y después conéctalas. Mientras construyes, trata de colocar tu modelo en la misma dirección que se muestra en las instrucciones.

Continúa

3. Los colores desteñidos muestran que esta sección ya está construida. Conecta las nuevas secciones en los lugares señalados por las flechas. Las nuevas piezas que agregues estarán en colores vivos.

Espaciadores

4. Hay lugares en tu modelo donde tendrás que agregar Espaciadores azules y plateados. Cérciorate de usar el color correcto y cuéntalos con cuidado.

Conectores

5. Hay conectores azules y plateados con ranuras largas especiales. Se enganchan deslizándose como ves en los dibujos. Conecta estas piezas empujándolas hasta que oigas "clic".

Varillas Flexibles

6. Una Varilla Flexible es una Varilla que se puede doblar para formar curvas. Serán más fáciles de conectar a tu modelo si primero las doblas hacia atrás y hacia adelante.

Precaución:

 7. Las gomas pueden causar daños si se sueltan con fuerza, se rompen o se pierde su control. Al construir los modelos que se muestran en las instrucciones, sujetar bien la goma y no estirarla demasiado. Las gomas deben usarse únicamente como se indica en las instrucciones. **NO USAR GOMAS QUE ESTÉN DESGASTADAS NI RASGADAS.** Precaución: Mantenga las gomas elásticas alejadas de la cara y los ojos.

D Inhalt

Von Hubschraubern bis hin zu Raumschiffen, von einem tollen Riesenrad bis hin zu einem Chopper-Bike – diese Modelle wurden von Hunderten von Kids speziell für diesen Bausatz ausgewählt! Builders' Choice ist der erste von Kids gebastelte Bausatz, der durch seine coolen Metallfarben glänzt. Wie immer helfen dir unsere Schritt-für-Schritt-Anweisungen, die einzelnen Modelle zu bauen... oder lass deiner Fantasie freien Lauf und baue etwas völlig Neues oder Verrücktes!

Bauen mit K'NEX

1. Es gibt drei Schwierigkeitsstufen.

einfach

mittel

schwieriger

Achtung - und los geht's

2. Um mit dem Bau deines Modells zu beginnen, suchst du zuerst das Teil mit der Nummer , dann das mit der Nummer 2 und so weiter. Jedes Teil hat eine bestimmte Form und Farbe. Schaue einfach auf das Bild und suche dann die gleichen Teile in deinem Bausatz. Dann steckst du die Teile zusammen. Am besten ist es, wenn du die Teile im selben Winkel hältst, wie in der Abbildung, damit du sie an der richtigen Stelle anbringst.

Und weiter geht's

3. An den blassen Farben kannst du erkennen, welcher Teil bereits fertig ist. Das neue Teil gehört da hin, wo Pfeile hin zeigen. Dieser Teil ist in bunter Farbe.

Abstandsstücke

4. An bestimmten Stellen in deinem Modell musst du Abstandshalter, sogenannte Spacer, einbauen. Diese Abstandshalter sind blau und silberfarben. Achte darauf, dass du die richtige Farbe wählst und dass du die richtige Anzahl davon verwendest.

Verbindungsstücke

5. Blaue und silberfarbene Steckanschlüsse haben besonders lange Schlitzte. Wie du auf der Abbildung sehen kannst, lassen sie sich ineinander schieben. Achte beim Aneinanderfügen dieser Teile darauf, dass du ein Klickgeräusch hörst. Erst dann sind die Teile fest miteinander verbunden.

Flexi-Laschen

6. Eine Flexi-Lasche ist eine Lasche, die du zu einer Kurve zurechtbiegen kannst. Sie lassen sich leichter an dein Modell anschließen, wenn du sie mehrmals hin- und herbiegst, um sie flexibler zu machen, bevor du sie das erste Mal benutzt.

Vorsicht:

 7. Gummibänder können Verletzungen hervorrufen, wenn sie reißen, zurückspringen oder wenn sie nicht vorsichtig gehandhabt werden. Halten Sie die Gummibänder während des Zusammenbaus der Modelle fest, ohne sie jedoch zu überdehnen. Verwenden Sie die Gummibänder gemäß den Anweisungen. **WENDEN SIE NIEMALS AUSGEFRANSTE ODER ZERRISSENE GUMMIBÄNDER.** Vorsicht: Gummibänder bitte von Augen und Gesicht fernhalten.

NL Wat zit erin

Of het nu helicopters of ruimteexploratoren zijn, of een knap reuzenrad of een chopper motorfiets, deze modellen werden uitsluitend voor dit geheel gekozen door honderde kinderen! Builders' Choice is het eerste geheel dat door kinderen werd samengesteld met knappe metaalkleuren. En zoals altijd helpen progressieve instructies je met het opbouwen van elk model... of gebruik gewoonweg je eigen verbeelding om met iets nieuws voor de dag te komen!

Bouwen met K'NEX

1. Je vindt modellen voor drie bouwpeilen.

Niet moeilijk

Nogal moeilijk

Zeker moeilijk

Klaar - Bouwen maar

2. Om met je model te beginnen, zoek naar  en volg de nummers. Elk onderdeel heeft dezelfde vorm en kleur. Kijk gewoonweg naar de afbeelding, vind in je geheel de stukken die overeenstemmen met wat je ziet en druk ze in mekaar. Tracht je model in dezelfde richting te behouden als op de afbeelding zodat je de stukken op de juiste plaats zult vastmaken.

Verder ...

3. De vage kleuren duiden aan dat dit gedeelte reeds opgebouwd is. Het nieuwe deel moet aangebracht worden op de plaats waarop de peilen gericht zijn. Dit stuk zal in volle kleur aangetoond zijn.

Afstandsstukken

4. In je model zijn er plaatsen waar blauwe en zilveren tussenstukken moeten toegevoegd worden. Verzeker je ervan de juiste kleur te gebruiken en tel ze zorgvuldig.

Koppelstukken

5. Er zijn blauwe en zilveren koppelstukken met speciale lange gleuven. Ze schuiven in mekaar zoals je kunt zien op de afbeeldingen. Duw deze onderdelen in mekaar tot je een "klik" hoort.

Flexi-Rods

6. Een Flexi-Rod is een stang die kan gebogen worden om bochten of curves te maken. Ze maken zich gemakkelijker vast aan je model wanneer je ze eerst een paar keer heen en weer buigt.

Let op:

7. De elastiekjes kunnen letsel veroorzaken door terugklappen, breken of doordat je er de controle over verliest. Bij het inelkaar zetten van de modellen het elastiekje stevig vasthouden en het niet te ver uitrekken. De elastiekjes uitsluitend gebruiken zoals in deze aanwijzingen aangegeven. **GEEN ELASTIEKJES MET RAFELS OF SCHEUREN GEBRUIKEN.** Let op: Houd de elastiekjes uit de buurt van handen en ogen.

HEY KIDS! Many of the models in this Builders' Choice Set are sized just right for a K'NEXman figure. Add a pilot to your Helicopter, a rider for your Chopper or an astronaut in your Planetary Rover!

Be one of the first 2,000 people to log on to www.knex.com/builderschoice and enter the secret code (BC0401) to register your Builders' Choice Set. We'll send you a cool K'NEXman figure - just like me! (Colors may vary.)

This offer is only good while the 2,000 K'NEXmen are available, so ask a parent for permission to log on today! Once my 2,000 K'NEXman friends are gone, the offer ends.

Offer valid only for residents of the United States and Canada through January 31, 2005 or while supplies last. Void where prohibited or restricted by law. Builders under 18 must have a parent's permission.

Offre valable exclusivement pour les résidents des États-Unis et du Canada jusqu'au 31 janvier 2005, ou tant que l'article sera en stock. Nul où la loi l'interdit ou en cas de restrictions légales.

SALUT TOUT LE MONDE! Un grand nombre des modèles de ce Builders' Choice Set ont été conçus pour accueillir un personnage K'NEXman. Installe un pilote dans ton Helicopter, un conducteur dans ta V-Car ou un astronaute dans ton Planetary Rover!

Sois l'une des 2 000 premières personnes à te connecter sur www.knex.com/builderschoice et entre le code secret (BC0401) pour enregistrer ton Builders' Choice Set. Nous t'enverrons ce chouette personnage K'NEXman! (Les couleurs peuvent varier.)

Cette offre n'est valable que pendant la période durant laquelle les 2 000 K'NEXmen sont disponibles, demande donc à un parent la permission de te connecter aujourd'hui! Une fois les 2 000 K'NEXmen distribués, l'offre n'est plus valable.
