- Do not mix old and new batteries or alkaline, standard (carbon-zinc) or rechargeable (nickel-cadmium) batteries. Only batteries of the same or equivalent type recommended should be used.
- Always remove weak or dead batteries from the product; do not short-circuit supply terminals.
- Insert batteries with correct polarity (+/-) as shown.

### Important Tips

- Alkaline batteries AA (LR6) are recommended.
- Rechargeable batteries are not recommended.
- Remove rechargeable batteries from toy before charging; they must be charged only under adult supervision.
- Non-rechargeable batteries must not be recharged.
- Keep components free of dust; do not immerse or use in water.
- Do not dispose of batteries in a fire; they could leak or explode and cause injury.
- Remove all batteries if the toy will not be used for a long period of time.
- Do not put Rods smaller than 2 inches in any openings of the motor; they will damage the motor, and cannot be removed.

### How to Insert and Remove Batteries

- Use a small Phillips head screwdriver to loosen the screw. Insert 2 fresh AA batteries (LR6) into the compartment with the correct polarity (+/-) as shown here.

## BUILDING BASICS

### Start Building

To begin your model, find the **1** and follow the numbers. Each piece has its own shape and color. Just look at the pictures, find the pieces in your set that match and then connect them together. Try to face your model in the same direction as the instructions while you build. Faded colors show you this section is already built. You'll want to connect the new section to the place where the arrows are pointing.

### Connectors

There are blue and gray Connectors with special long slots. They slide together as you see in the pictures. Push these parts together until you hear a "click."

### Spacers

There are places in your model where you need to add blue and silver Spacers. Be sure to use the right color and count them carefully.

### Chain

Be sure to attach all the Chain Links in the same direction.

### Parts Count

Before you start building, be sure to compare the parts in your set with the parts listed here. If anything is missing, call or write to us using the information on the back cover. We're here to help!

# Track & Car Building Tips:

1. To connect the Track pieces, line up the metal pins and push until they are tight. Always connect the Track top side to top side throughout the build.

Top Side of Track

2. Attach the black Chain Guides to the top of the Track and attach the Connectors to the bottom of the Track exactly as shown. Push the Connectors on firmly until they “click”.

3. To attach the Cars, squeeze the Track slightly and hook the wheels on the Track. If the Cars get stuck on the way down, make sure the Cars are not hitting any K'NEX pieces.

## FR Conseils pour le circuit :

1. Les voitures roulent sur la partie supérieure du circuit. Pour fixer les voitures, pince légèrement le circuit et fixe les roues dessus. Connecte toujours le côté supérieur du circuit contre le côté supérieur tout au long de la construction.
2. Fixe les guides de chaîne à la partie supérieure du circuit. Fixe les connecteurs à la partie inférieure du circuit exactement comme l'indique le schéma. Pousse bien les connecteurs jusqu'à ce qu'ils « cliquent ».
3. Sujeta las Guías de Cadena al lado superior de la Pista. Sujeta los Coches, aprieta la Pista levemente y engancha las ruedas en la Pista. Al construir, conecta siempre la Pista de lado superior a lado superior.

## ES Consejos para armar las Pistas:

1. Los coches corren en el lado superior de la Pista. Para sujetar los Coches, aprieta la Pista levemente y engancha las ruedas en la Pista. Al construir, conecta siempre la Pista de lado superior a lado superior.
2. Sujeta las Guías de Cadena al lado superior de la Pista. Sujeta los Coches, aprieta la Pista levemente y engancha las ruedas en la Pista. Al construir, conecta siempre la Pista de lado superior a lado superior.
3. Para sujetar los Coches, aprieta la Pista levemente y engancha las ruedas en la Pista. Si los coches quedan atascados mientras van hacia abajo: Asegúrate de que el coche no esté golpeando ninguna de las piezas K'NEX.

## DE Tipps für die Schienen:

1. Hierzu müssen die Metallstifte der Schienenstücke aufeinander ausgerichtet sein. Drücke sie so fest, dass sie einhaken. Die einzelnen Schienenstücke müssen immer mit der Oberseite nach oben zeigen, wenn sie miteinander verbunden werden.
2. Maak de kettinggidsen vast bovenaan het spoor. Maak de koppelstukken vast aan de onderkant van het spoor precies zoals afgebeeld. Druk de koppelstukken goed erin tot ze “klikken”.
3. Om de wagens vast te maken, knijp lichtjes aan het spoor en haak de wielen op het spoor vast. Wanneer wagens vastlopen tijdens de daling: Verzeker je ervan dat de wagen tegen geen K'NEX onderdelen aanloopt.

## IT Punte delle rotaie:

1. Per collegare i pezzi della rotaia, allinea i perni di metallo e spingi fino a che si agganciano alla chiusura. Collega sempre la rotaia parte superiore a parte superiore in tutta la costruzione.
2. Attaca le guide a catena sulla parte superiore della rotaia. Collega i connettori sulla base della rotaia esattamente come illustrato. Premi i connettori saldamente fino a che si fissano con uno scatto.
3. Per collegare le carrozze, stacca un pezzo di rotaia e quindi infila le ruote della carrozza sulla parte superiore della rotaia. Quindi unisci i pezzi della rotaia. Se le carrozze si arrestano durante la discesa: Controlla che la carrozza non abbia colpito qualche altra parte K'NEX.

## PT Sugestões para a Pista:

1. Para ligares as peças da Pista, alinha os pinos metálicos e empurra-os até prenderem o Engate. Liga sempre a face superior da Pista à face superior durante a montagem.
2. Prende as Guías de Corrente ao topo da Pista. Liga os Conectores à base da Pista exactamente como demonstrado. Faz avançar os Conectores firmemente até “encaixarem” com um estalido.
3. Para prenderes as Carruagens, desliga uma peça da Pista e, seguidamente, enfia as rodas da Carruagem sobre a face superior da Pista. Depois junta as peças da Pista umas às outras. Se as Carruagens ficarem encravadas na descida: Assegura-te de que a Carruagem não está a chocar contra outras peças K'NEX.

## NL Spoortips:

1. Om de spoorstukken aan mekaar vast te maken, stel de metalen pinnen op in een rij en druk ze in tot zich vasthechten. Maak steeds de bovenkant van het spoor vast aan de bovenkant tijdens de opbouw.
2. Maak de kettinggidsen vast bovenaan het spoor. Maak de koppelstukken vast aan de onderkant van het spoor precies zoals afgebeeld. Druk de koppelstukken goed erin tot ze “klikken”.
3. Om de wagens vast te maken, knijp lichtjes aan het spoor en haak de wielen op het spoor vast. Wanneer wagens vastlopen tijdens de daling: Verzeker je ervan dat de wagen tegen geen K'NEX onderdelen aanloopt.

## SV Tips för banor:

1. Koppla ihop bandelarna genom att rikta upp metallstiften och tryck ihop dem tills de sitter tätt. Banan har en övre och undre sida.
2. Fäst kopplingarna till banans undersida precis enligt figuren. Tryck fast kopplingarna ordentligt tills du hör ett “klikk”.
3. Fäst bilarna genom att klämma ihop banan en aning och fäst hjulen vid banan. Om bilarna fastnar på vägen ner, ska du kontrollera att bilarna inte stöter mot några K'NEX delar.

## DA Tips om skinner:

1. Skinnestykkerne sættes sammen ved at stille metalstifterne på linje og skubbe dem sammen, indtil de sidder stramt. Skinnerne har en overflade- og en bundside.
2. Sæt samlestykkerne fast på bunden af skinnerne nøjagtigt som vist. Skub samlestykkerne fast på bunden, indtil de siger “klik”.
3. Vognene sættes på ved at klemme lidt på skinnerne og hægte hjulene på skinnerne. Hvis vognene sætter sig fast på nedvejen, skal man sørge for, at de ikke rammer nogen K'NEX-dele.

## NO Sportips:

1. For å sette sammen spordelene: still metallstiftene på linje og skyv til de er stramme. Sporet har en øvre og nedre side.
2. Fest skjøtemunnstykkene til undersiden av sporet nøyaktig som vist. Skyv skjøtemunnstykkene bestemt på inntil du hører et “klikk”.
3. Press forsiktig på sporet og hekt vognhjulene på sporet for å feste vognene. Dersom vognene setter seg fast på veien ned, kontroller at de ikke berører noen av K'NEX-delene.

## FI Ratavijheitä:

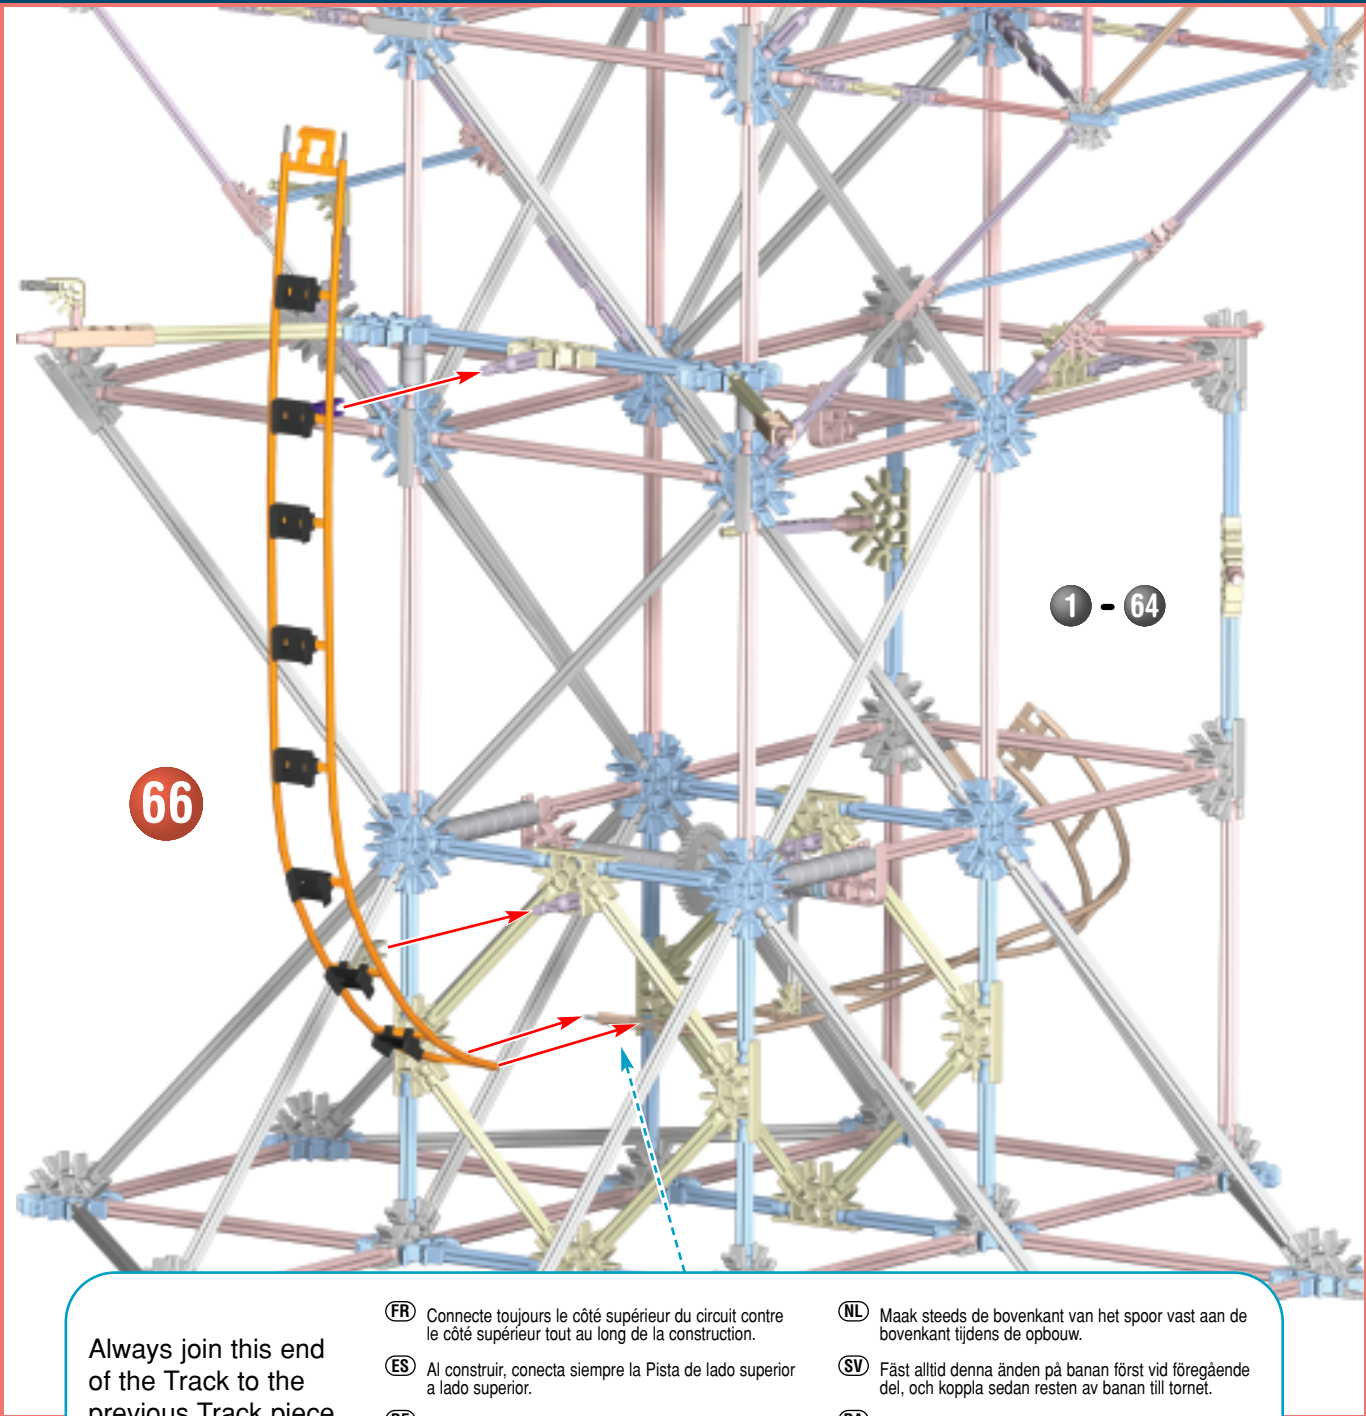

1. Liitä radan osat kohdistamalla metallinastat ja paina ne tukevasti yhteen. Radalla on ylä- ja alaisu.
2. Kiinnitä liittimet radan alaisuulle tarkasti kuvan mukaisesti. Paina liittimet paikalleen tukevasti kunnes kuulet “klikkauksen”.
3. Kiinnitä autot paimalla rataa hieman yhteen ja kiinnitä pyörät rataan. Jos autot jäävät kiinni matkalla alas, varmista, etteivät autot törmää mihinkään K'NEX osaan.

### Forældre! Sådan kan I hjælpe jeres barn med at bygge med K’NEX!

Opbevar denne brugsanvisning på et praktisk sted. Den indeholder vigtig sikkerhedsinformation. Læs alle advarsler og anvisninger, inden påbegyndelse af bygning og betjening af modellen.

**ADVARSEL: FARE FOR KVÆLNING PÅ GRUND AF SMÅ DELE.** Ikke beregnet til børn under 3 år.

**FORSIGTIG:** Hold hår, fingre, ansigt og påklædning på afstand af alle bevægelige dele.

**FORSIGTIG:** Pas på ikke at vælte modellen. Modellen skal anbringes på en flad og hård overflade.

### Oplysninger om batterier:

- Forsigtig: Sådan undgås det, at batterierne lækker
- Sørg for at sætte batterierne rigtigt i og for altid at følge brugsanvisningen fra legetøjs- og bat-teriproducenten.
- Lad være at blande gamle og nye batterier sammen, eller at blande alkaliske, almindelige (kul-stof-zink) eller genopladelige (nikkel-kadmium) batterier med hinanden. Det er kun tilladt at bruge batterier af samme eller tilsvarende type iflg. anbefaling.
- Tag altid svage elle udbrændte batterier ud af produktet, og pas på ikke at kortslutte polerne.
- Sæt batterierne i, så polariteten (+/-) er korrekt iflg.illustrationen.

Vigtige råd

- Det anbefales at bruge 2 (LR6) alkaliske batterier.
- Batterier, der kan genoplades, frarådes.
- Tag genopladelige batterier ud af legetøjet, inden de oplades; de må kun oplades under opsyn af en voksen.
- Batterier, som ikke er genopladelige, må ikke genoplades.
- Støv delene godt af. Lad være at nedsænke dem i vand.
- Batterier må ikke afskaffes ved at brænde dem; de risikerer at lække eller eksplodere, hvorved folk kan komme til skade.
- Tag alle batterier ud, hvis ingen skal lege med legetøjet i en længere periode.
- Undlad at stikke stænger mindre end 5,08 cm ind i nogen som helst åbninger i motoren; de vil beskadige motoren, og de kan ikke fjernes.

Sådan sættes der batterier i, og sådan tages de ud:

- Brug en lille stjerneskruerækker til at løsne skruen. Sæt 2 friske AA-batterier (eller LR6) i bat-terirummet, sørg for korrekt polaritet (+/-) iflg. illustrationen.

### K’NEX bygningsprincipper

Begynd at bygge:

Hver del har sin egen farve og form. Se på billedet, find de dele, der matcher, og sæt dem sam-men. Prøv at holde din model i samme retning som billedet, så du kommer til at sætte delen fast på den rette plads. De falmede farver er de afsnit, du allerede har bygget.

Du skal samle de næste dele på det sted, som pilene peger på. Der findes ikke nogen pil for hvert eneste samlingssted.

Samestykker

Der er blå og sølvfarvede samestykker med særlige lange slidser, som skydes sammen. Skub delene sammen, indtil du hører et “klik”.

Afstandsstykker

Der er steder i modellen, hvor du får brug for at tilføje afstandsstykker. Sørg for at bruge de rette stykker og tæl den omhyggeligt.

- Batterier som ikke er oppladbare, må ikke lades opp.
- Hold delene frie for støv; dypp dem ikke ned i eller bruk i vann.
- Ikke kast batteriene i ild eller flamme; de kan lekke eller eksplodere og forårsake skade.
- Ta alle batterier ut dersom leketøyet ikke skal brukes over tid.
- Putt ikke stenger på mindre enn 5,08 cm inn i noen av motorens åpninger; de vil skade motoren og kan ikke fjernes.

Hvordan sette inn og fjerne batterier:

- Bruk et lite skrujern med krysshode til å løsne på skruen. Sett to nye AA-batterier (eller LR6) inn i feltet med riktig polaritet (+/-), som vist her.

### K’NEX grunnbygging

Sett i gang byggingen:

Hver del har sin egen farge og fasong. Se på bildet, finn de delene som tilsvarer hverandre og sett de sammen. Forsøk å holde modellen din i samme retning som bildet slik at stykket festes til det rette stedet. Det bleke fargene er de seksjonene som du allerede har bygget. Du skal feste de neste delene der hvor pilene peker. Det finnes ikke en pil for hvert skjøtepunktsted.

Skjøtemunnstykker

Det er blå og sølvfargede skjøtemunnstykker med spesielt lange åpninger, som glir sammen. Skyv delene sammen inntil du hører et klikk.

Mellomlegg

Noen steder må du bruke mellomlegg i modellen din. Pass på å bruke de riktige mellomleggene og tell dem nøye.

### Vanhemmat! Näin voitte auttaa lapsianne rakentamaan K’NEX-sarjalla

Pidä nämä ohjeet helposti saatavilla. Ne sisältävät tärkeää turvallisuustietoa.

Lue kaikki varoitukset ja ohjeet ennen kuin alat rakentaa ja käyttää mallia.

**VAROITUS!** Ei alle 3-vuotiaille lapsille.

**VAROITUS!** Pidä hiukset, sormet, kasvot ja vaatteet loitolla kaikista liikkuvista osista.

**VAROITUS!** Varo kaatamasta mallia. Malli on asetettava tasaiselle ja kovalle pinnalle.

### Tietoa paristoista:

Varoitus! Vältä paristovuotoja

- Asenna paristot oikein ja noudata aina lelun ja paristojen valmistajien ohjeita;
- Älä sekoita vanhoja ja uusia paristoja tai alkali-, normaali- (hiili-sinkki) tai ladattavia (nikkeli-kadmium) paristoja. Vain samaa tai vastaavaa tyyppiä olevia paristoja saa käyttää;
- Poista aina heikot tai käytetyt paristot tuotteesta; älä oikosulje napoja;
- Asenna paristot navat oikein päin (+/-) kuvan mukaisesti;

Tärkeitä vihjeitä

- Alkaaliparistoja 2 (LR6) suositellaan;
- Ladattavia paristoja ei suositella;
- Poista ladattavat paristot lelusta ennen lataamista; ne saa ladata vain aikuisen valvonnan alla;
- Ei-ladattavia paristoja ei saa ladata;
- Pidä osat pölyttöminä; älä upota tai käytä niitä vedessä;
- Älä polta paristoja; ne saattavat vuotaa tai räjähtää ja aiheuttaa vammoja;
- Poista kaikki paristot mikälii lelua ei tulla käyttämään pitkään aikaan.
- Älä aseta 5,08 cm pienempiä tankoja moottorin aukkoon; ne vaurioittavat moottoria, eikä niitä pysty poistamaan.

Paristojen asentaminen ja poistaminen:

- Käytä pientä ristipäämeisseliä ruuvin avaamiseen. Aseta 2 uutta AA-paristoa (tai LR6) paristoti-laan navat oikein päin (+/-) kuvan mukaisesti.

### K’NEX perusrakennusohjeita

Aloita rakentaminen:

Jokaisella osalla on oma värinsä ja muotonsa. Katso kuvaa, etsi käiksi toisiinsa sopivat palat ja pane ne yhteen. Yritä pitää mallisi samassa suunnassa kuin kuvassa jotta varmasti kiinnität osan oikeaan kohtaan. Haaleat värit osoittavat rakenteita, jotka olet jo tehnyt. Liitä seuraavat osat nuolien osoittamiin kohtiin. Nuolia ei ole jokaisessa liittäntäkohdassa.

Liittimet

Sarjassa on sinisiä ja hopeanvärisiä liittimiä, joissa on erityisen pitkiä aukkoja, jotka työnnetään toisiinsa. Työnnä osat yhteen kunnes kuulet napsahduksen.

Välitangot

Mallissasi on paikkoja joihin sinun on lisättävä välitankoja. Varmista, että käytät oikeita ja laske ne huolellisesti.
